## A SAFER DRIVING EXPERIENCE

Protect your windshield against damage  
by stone, sand and road debris

10X stronger than factory windshields.

Hydrophobic - repels rain, snow, slush, insects & more.

Inhibits glass pitting, small chips and fine scratches

HD Clarity - Reduce glare, extend reaction time,  
safer driving at night and during inclement weather.

Improve driver reaction time.

*Perfectly formulated to manage  
the tough Canadian environment.*

# SUPRA<sup>®</sup> C A N A D A

Improving visibility during precipitation events and at night can improve your reaction time and create a **safer driving experience for you and your family**. When Clear Armor is applied to your windshield, it makes **visibility crisper** as though you were looking through HD glass.

The Clear Armor process fills in all the peaks and valleys that glass naturally has, increasing repellency by sealing the windshield. This makes rain, insects, snow, and frost easier to remove.

Clear Armor is a product that has outstanding durability, very long service life, very high abrasion resistance and chemical resistance.

## THE NATURE OF GLASS

Under a microscope you will be able to see that glass is not flat. There are peaks and valleys that leave the glass vulnerable to road debris, making it easy to chip and crack. When a stone glances off your windshield it can catch one of these peaks or valleys and damage your windshield.

The thousands of peaks and valleys in your windshield also refract light. When light is refracted it creates a blurry image or what we perceive as road glare.

By applying the Supra ClearArmor windshield treatment you eliminate the three elements above, giving you a stronger windshield, clearer vision by reducing glare, and the ability to remove ice, snow and even insects with ease.

*The information contained above is only an overview of the product.*

**Protect yourself by asking for Supra Clear Armor windshield protection to be applied to your windshield today.**
